@westleyl

Who is Liam Westley?

Head of Engineering, and responsible for the mobile and desktop teams at Huddle

- iOS; iPhone and iPad applications
- Android
- Desktop Windows
- Desktop OS/X

And he owns too many devices ...

- Windows Phone, Android phones (F to L) and tablets (Nexus 7 and 9), iPad mini, Windows; laptops, 10" and 7" tablets, Kindle

‘Two roads diverged in a wood, and I -
I took the one less travelled by,
And that has made all the difference.’

The Road Not Taken
Robert Frost, 1920

This is not the path you are looking for ...

This is not the path you are looking for ...

But it might be ... it might just not be the path that Kew Gardens wants you to use?

Maybe ... they should build a path here?

... or is it indicating that they should improve the path they would like you to use?

More than one path

- Multiple paths are OK
- If you don't build it, be ready for users to try to build it
- Users don't think like developers
- Regional variations

Regional UX ... the UK is horrified

This week's General Committee debates

Week commencing Monday 09 February 2015

Version: **Uncorrected**

Contents **Read** Watch

Print

Tuesday 10 February 2015
(Afternoon)
[Mr Peter Bone in the Chair]

National Health Service (Amended Duties and Powers) Bill

2.30 pm

The Chair:

Before we resume our consideration of the amendments to clause 1, it might be helpful if I report the reassurance that I have received from the Public Bill Office that our proceedings are not at risk and the Bill does not require the support of a money resolution. In addition, I have notified the House, as there is no specific time at which we must adjourn today—that is at the discretion of the Committee—that we may be sitting through the night.

Chinese stock market boards

Embrace the different paths

Don't force users to make pointless choices

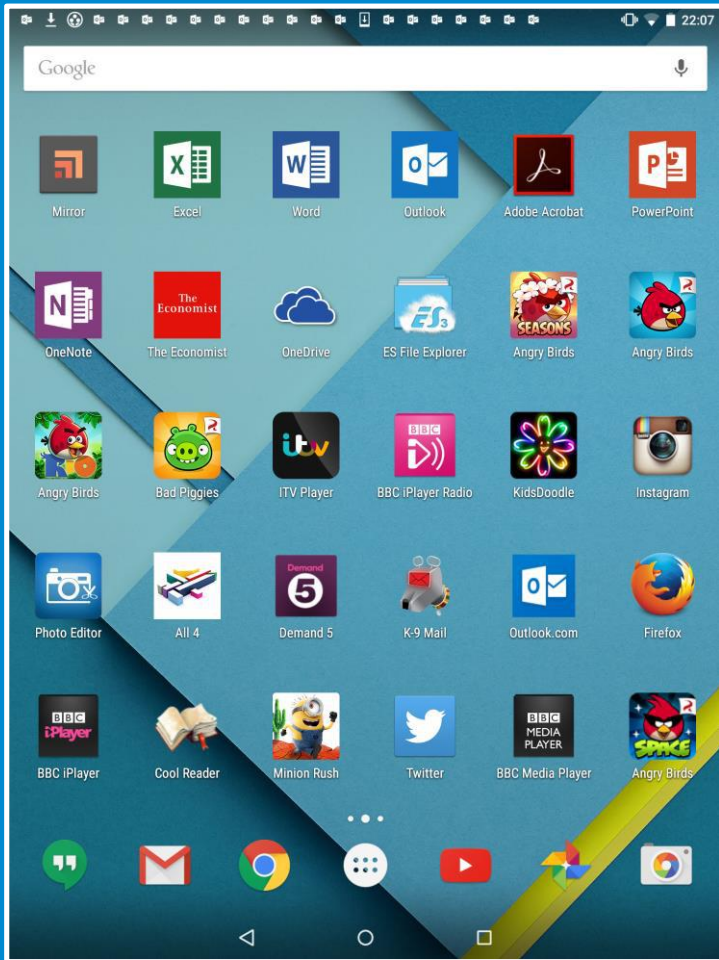

- Outlook closing dialog
 - Yes - save
 - No - discard changes
 - Cancel - review what changed
- But what happens when you close down Windows?
 - Cancel does not allow you to go back, as the main Outlook window has already closed.

Don't force users to make pointless choices

- Cash machine (ATM)
 - You are shown a menu; €20, €30, €40, €50, €100
 - You request €30
 - To be told, there are no €10 notes, and have to enter a manual amount

**IT KNEW THERE WERE NO €10 NOTES
AND IT DIDN'T CARE**

Too much information?

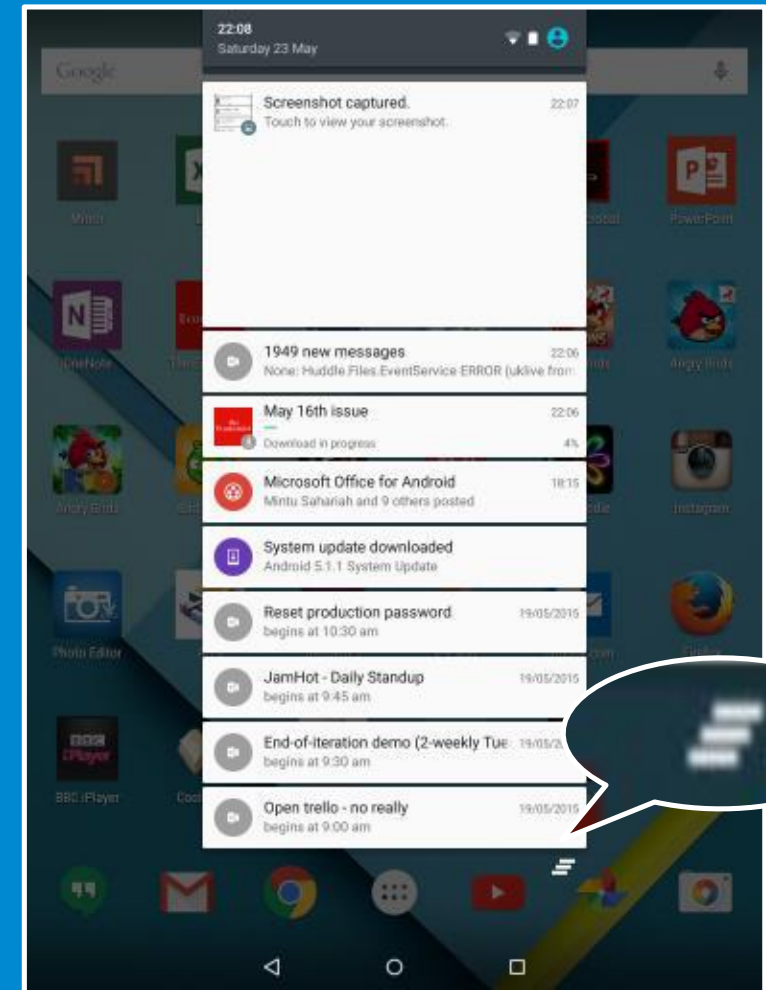

Wow – There must be something really important going on!

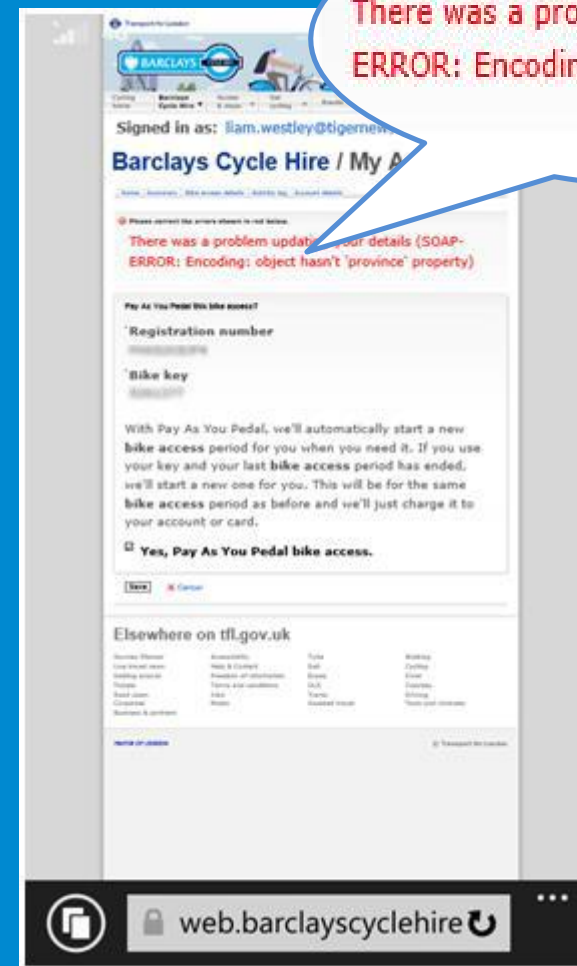

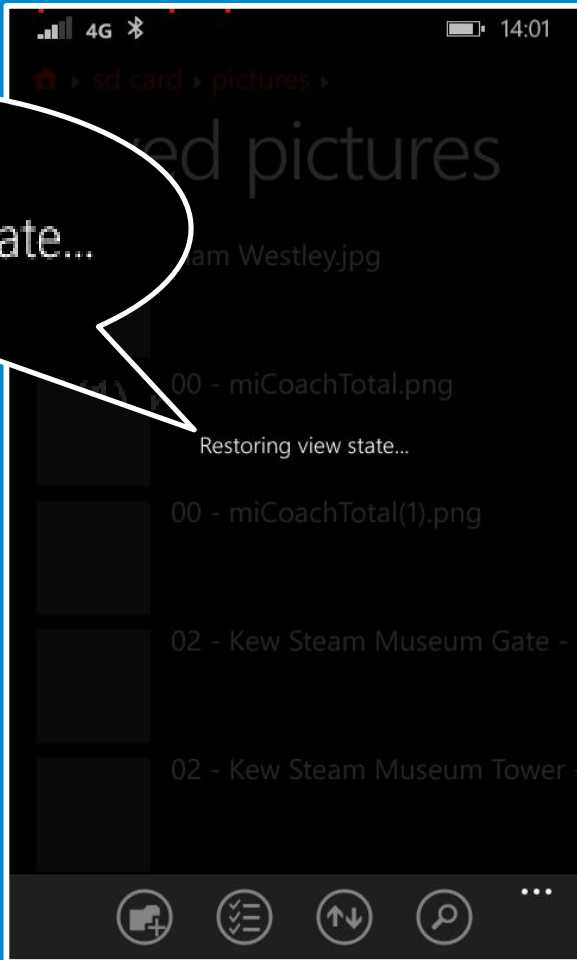

Too much information - overload

Oh no, it's just some calendar reminders ...

... and no way to clear them all easily.

Too much information - geeky

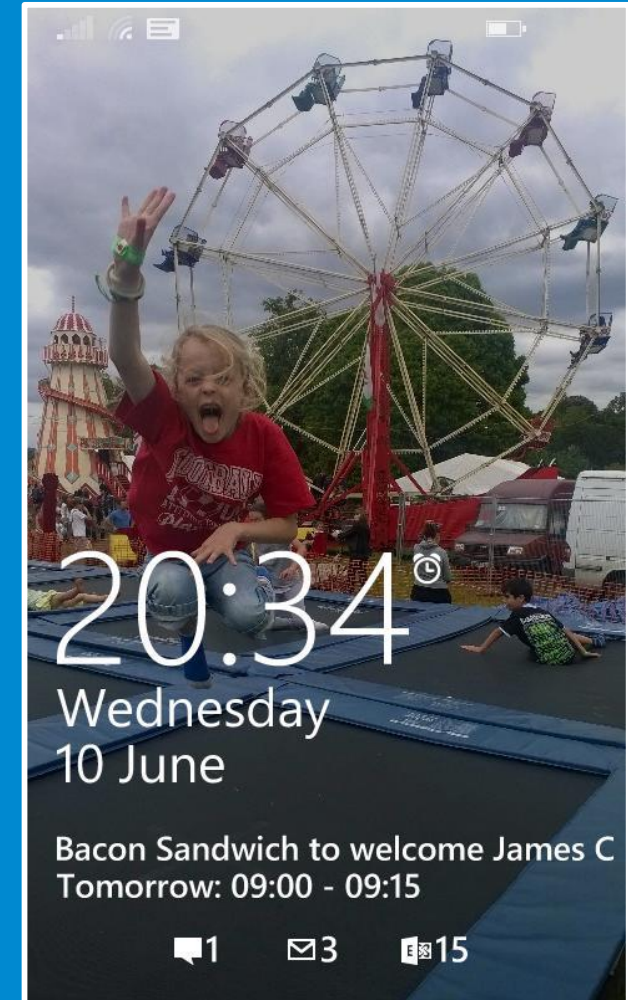

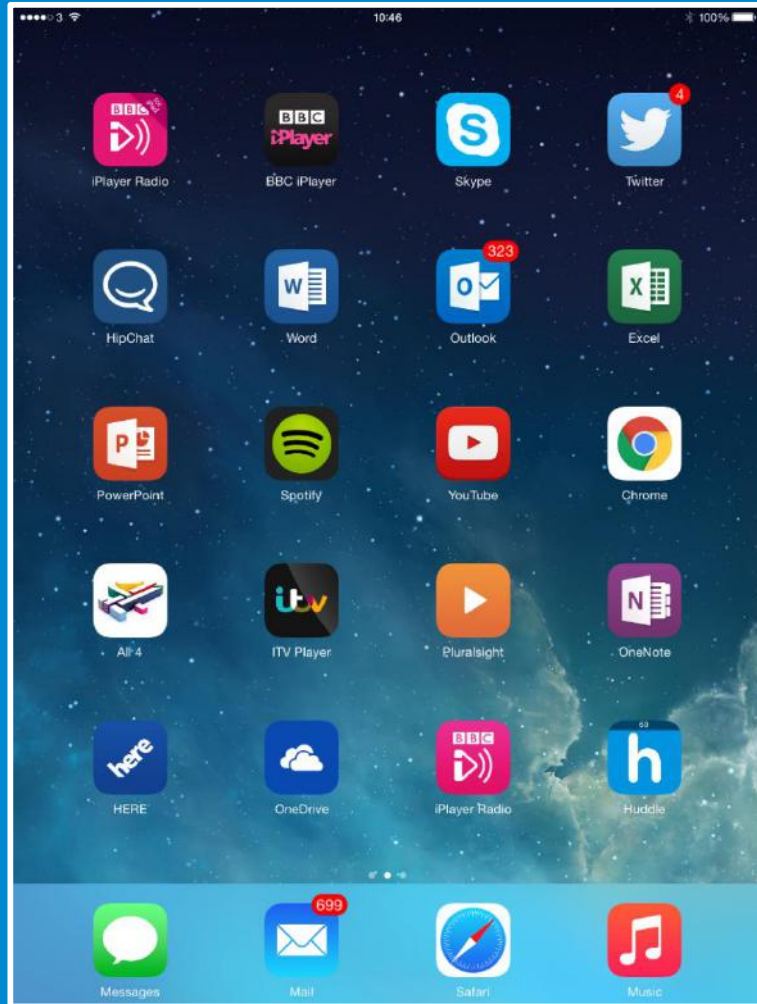

There was a problem updating your details (SOAP-ERROR: Encoding: object hasn't 'province' property)

Too much information

- Don't spam users with too much information
- Too many confirmation dialogs trigger auto acceptance
- Be careful with 'geeky' terminology

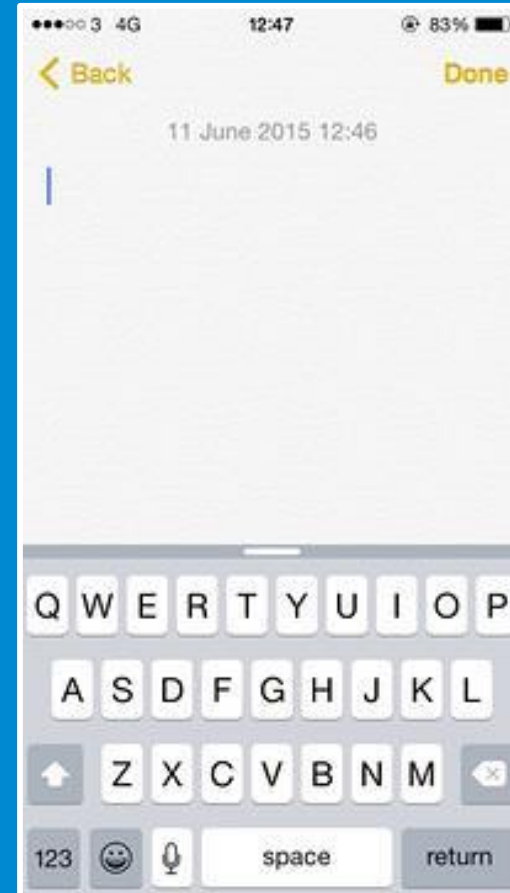

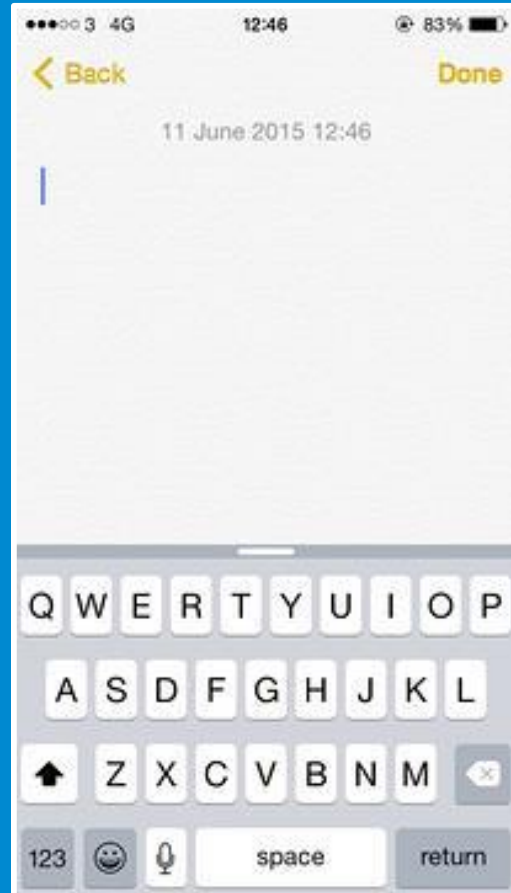

Too much information - solved

Too much information - very geeky

```
Stop# 6194 ID# 398  
LAN IP: XXX.XXX.XXX.200  
Connected (IP: XXX.XXX.XXX.216)  
Authenticating ...
```

Too little information

Too little information

- iOS keyboard – was my personal bug bear
- Outlook stupid dialog ... again
- Too little information causes people to navigate further through an application, or forces people to think

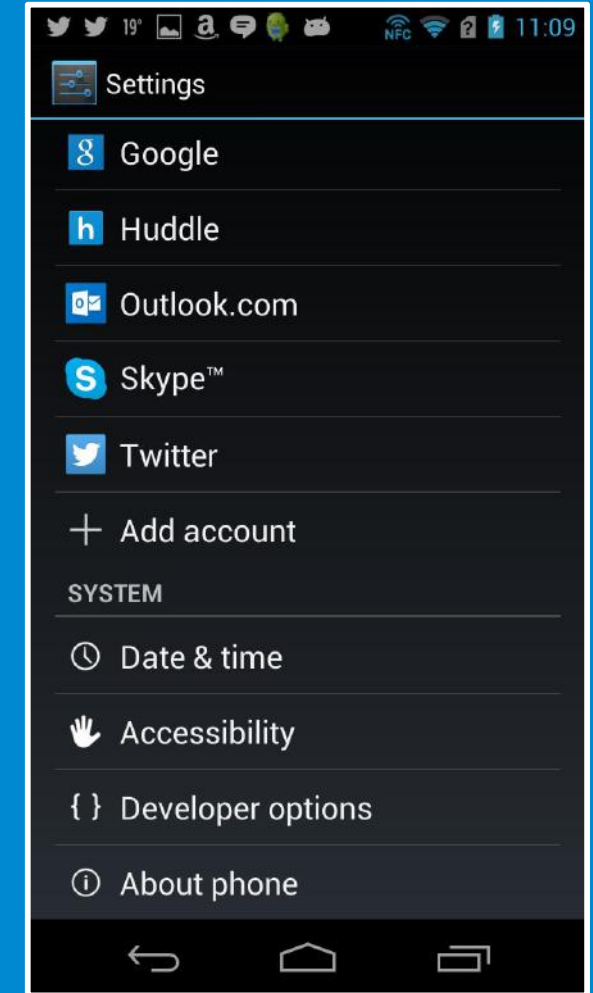

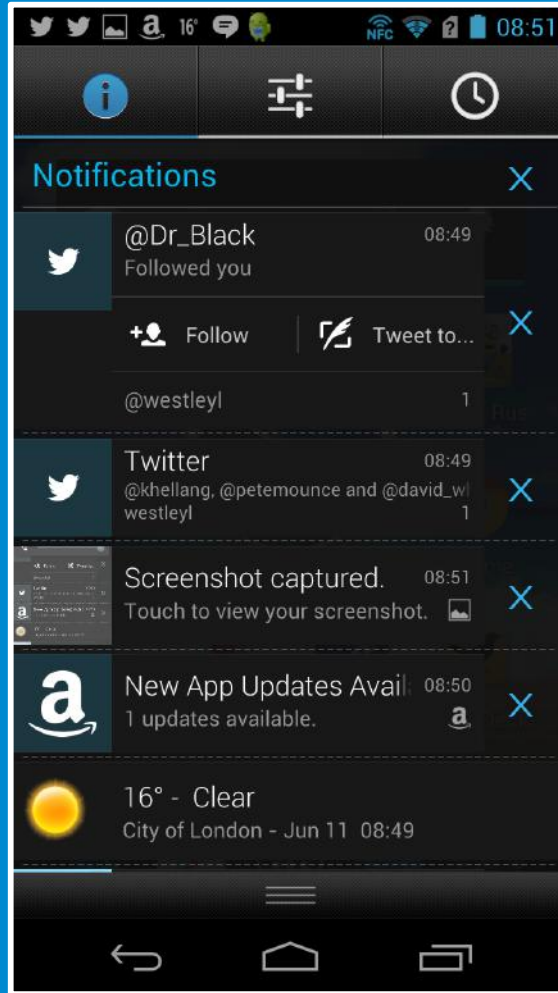

Consistency

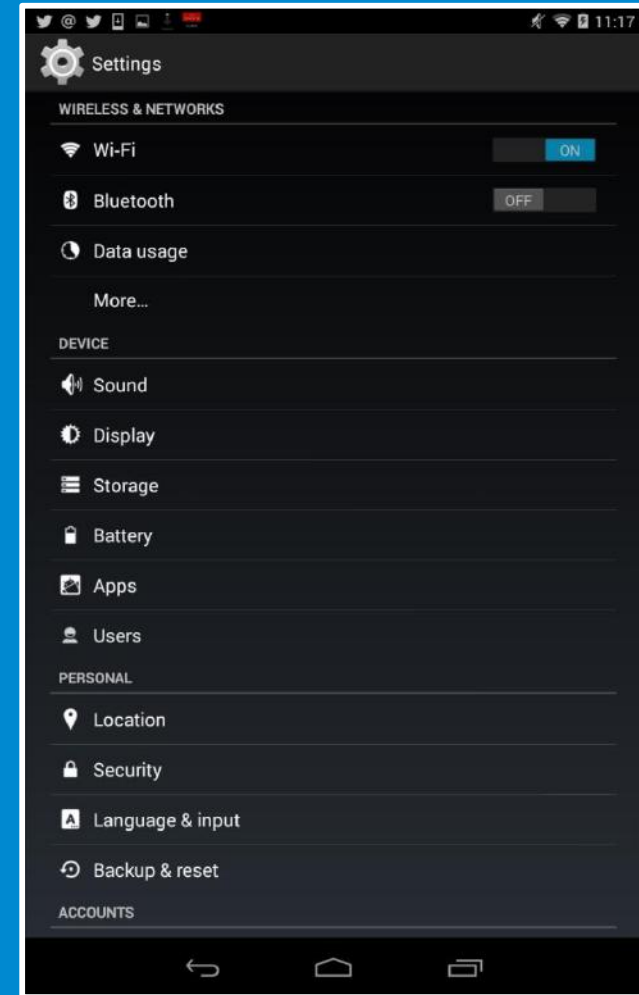

Android settings ... Gingerbread (ZTE Blade)

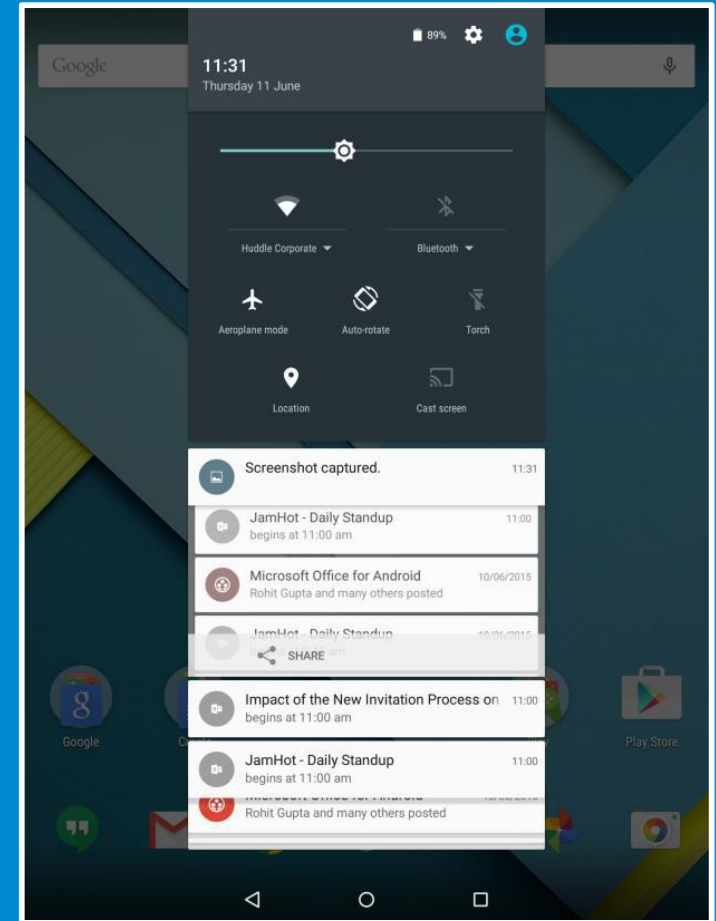

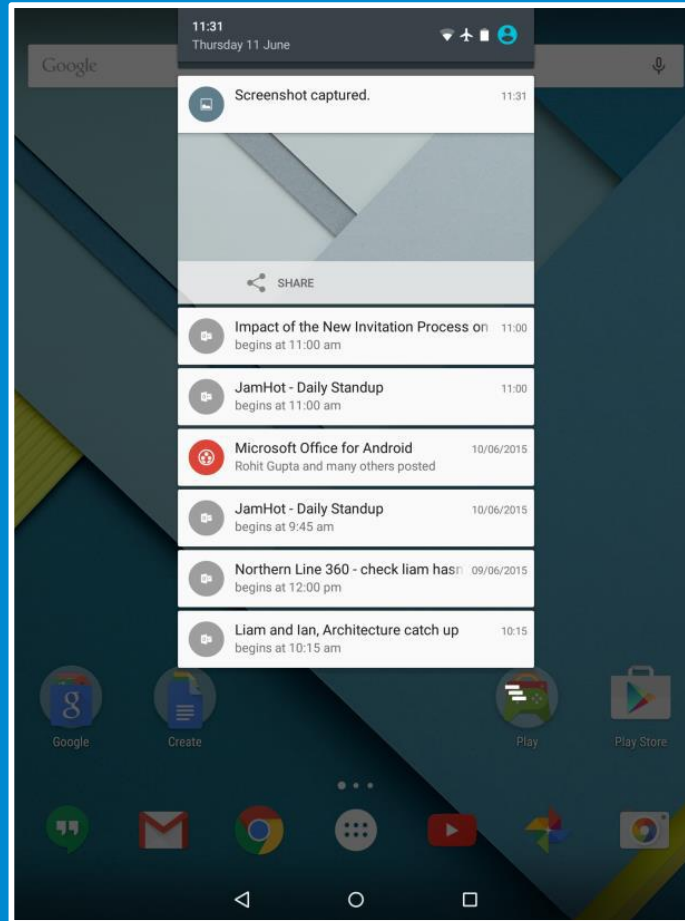

Android settings ... Jellybean (Acer S500)

Android settings ... KitKat (Nexus 7)

Android settings ... Lollipop (Nexus 9)

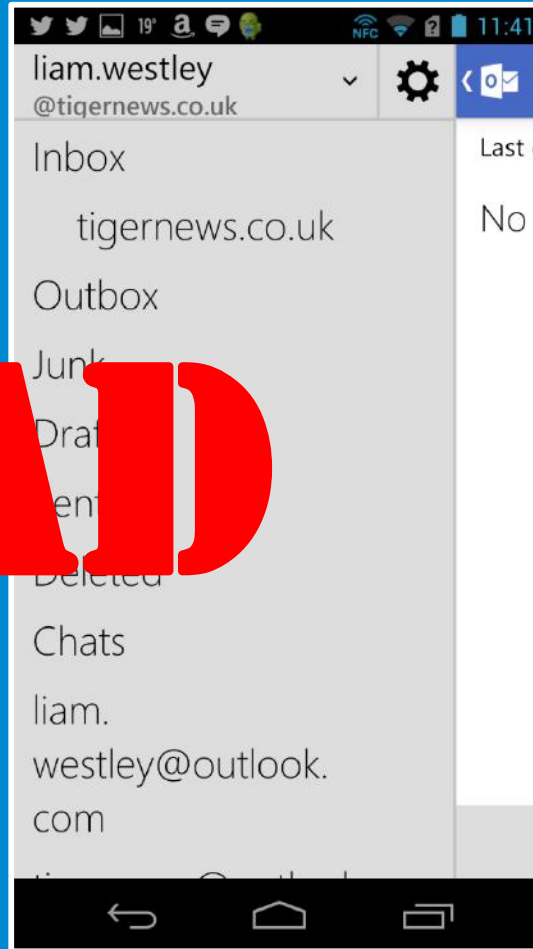

Consistency

- Hotel lift, 0 on button, G on notice.
- Android settings - who moved my cheese?
- Ctl+F in Outlook
- Be careful with accelerator keys in browsers

Consistency – application or platform

BAD

GOOD

Surprise your user – Siri and Cortana

You should've bought an iPhone

Mon, 19:05

P*** off.

Mon, 19:06

Surprise your user

- Good – Smart handling of High and Low dates
- Good – Search for a user
- Bad surprise – beware the ‘days in March’

Get friendly with your designer

- If designers should cope with technical concepts
 - in return we owe them a duty to understand design
- Affordance
 - provide a guiding hand to users
- Developers are the gatekeepers
 - we can and should question design decisions

Affordance – Push Me, Pull Me

Takeaways

- There is more than one way of doing the same thing
- Don't provide pointless choices
- Information balance - not too much, or too little
- Be consistent
- Surprise your users - in a good way
- Make friends with your designers

... and

DON'T
MAKE
ME
FEEL STUPID
